## **SlideBook 6 Network Licences**

The ICR has 6 Offline licences for SlideBook. These can be accessed from any PC in the building as long as it is on the network. You can also access SlideBook on the high specification analysis PCs located in the basement.

Please note there are a limited number of SlideBook licences to share between the institute so close the program when you have finished.

1. Download the SlideBook installer:

Visit <u>www.intelligent-imaging.com</u> and navigate to the Support section of the website

On this page you will be able to sign in to access installers.

User name: slidebook6

Password: slidebook

Download the latest installer, currently 6.0.13, soon to be 6.0.14, making sure to select the correct bit version for your operating system, 64 is the most common.

2. When running the installer you may see the following message which can be ignored:

Continue with installation (no key found)		×
SlideBook could not locate a hardware protection computer. If you are using a network license or wo functionality demonstration version please click O please cancel the installation and plug in your hard ensure this version of SlideBook will run properly o	key connected to your ould like to install a lim K to continue. Otherwi dware protection key. T on your computer.	ited se, This will
	ОК	Cancel

3. Finish running installer and launch SlideBook to configure the :

- SlideBook will run in demo mode when you first open it
- Navigate to the Administration tab highlighted in the red box above

Select Hardware Properties, in your version this will be greyed out, hold down Ctrl to make it clickable

- a) In Hardware Properties Navigate to SuperPro Network Settings and select Enabled
- b) Select Yes
- c) Press Apply change

⊡- Manual FRAP		Property Information

TIFF Export	÷	Revert To Default Close

Repeat as above for IP Address entering 172.21.64.10 for the IP, click Apply Change, followed by Close

4. Restart SlideBook and you should be able to run the full version

When running for the first time SlideBook will ask you if you want to change the preferences file to reflect the key number. Choose yes to avoid this message appearing again.

When using the rendering engine in SlideBook make sure to run Windows with an Aero theme to exploit the full power of the graphics card. You will notice rendering is slow and blocky when not running in Aero mode.
