

BCH/PCMM Microscopy Core

E q u i p m e n t t r a i n i n g

Training is required for use of any Core equipment. In general, five to six hours hands-on training will be required for unsupervised operation of most microscopes. Users must show proficiency in operation on an instrument before they will be given access to the scheduling calendar to book time on that particular instrument.

For additional information and to request training, please contact the Core Manager.
