## Nanostring Core sample submission instructions

- For gene expression assays, provide 100ng of RNA in 5 ul (20 ng/ul). Extra RNA will not be returned.
- Put samples in 0.5ml or 1.5ml microcentrifuge tubes labeled with numbers 1-12 (or 24, etc.) on the top and PI name on the side.
- Put the tubes in a box labeled on the side with "PI name", "Nanostring samples", and "date" (you can get your box back after your samples have been run)
- Fill out the sample information form with the sample names as you would like them to appear in your data.
- Keep in mind sample names cannot contain certain special characters ( . , : ; \* " \_< > ! ?). These characters will be replaced with dashes or spaces at the core's discrection.
- Email Karen Keslar, <a href="mailto:keslark@ccf.org">keslark@ccf.org</a>, to arrange a time to bring your samples to the lab.
