

Children's Specialty Group

August 5th, 2024

Histology and Imaging Core users,

We want to express our sincere gratitude for your continued support and loyalty to both the CRI Imaging and Histology Core. It has been our pleasure to assist you with your projects over the last 20 years. Our mission has always been to provide our investigators with high-quality histology and imaging services and will continue to uphold this commitment.

Due to sustained increases in the costs of supplies and staffing we find ourselves in a position where we must adjust our pricing. Despite our best efforts to absorb these rising costs over the years, it has now become essential for us to implement a rate increase to maintain the quality and standards we work hard to deliver to you.

Effective September 1st, the prices for our services will increase. We have completed rigorous evaluations of pricing structure and feel confident that with this increase we be able to keep our budget balanced.

We understand that price adjustments are never welcome news, and we assure you that this decision was not made lightly. Our commitment to you remains unwavering, and we will continue to work diligently to provide exceptional histology and imaging. We are confident that this change will allow us to maintain and even enhance the quality and reliability you depend on for your projects. If you have any questions or concerns regarding this change, please do not hesitate to contact us.

Once again, we appreciate your understanding and continued support of the CRI Histology and Imaging Core.
